You craft, we store

Each KISTENBERG product is approached individually. Each element is designed with attention to the tiniest details. Apart from their appearance, we focus on their practical purpose. Each product has its own color profile to maintain ultimate color coordination.

All elements are assembled manually, in full compliance with the requirements specified in the technical documentation. Thus, we can be sure that we deliver to you the product of the highest quality which you will be able to enjoy for many long years.

Polycarbonate organizer flaps provide higher impact resistance and improve the appearance of all our tool boxes.

Fastenings made from resilient components such as steel, aluminum, ABS and ABS with elastomer guarantee durability and the comfort of use.

Dust and water resistance as well as protection from weather conditions.

Multiple sales variants and sizes available. We offer a selection of various types of covers, fastening, fitting and accessories for storing small elements.

The wide assortment of KISTENBERG products and their multifunctionality enable organizing the space of your workshop, garage or construction site. The possibility of combining, stacking, mounting and others help better organize your workspace, and make your work a more enjoyable experience.

The value of a brand depends largely on the perception of the product's quality, its durability, how long its life is, and how consumers rank it against the competition.

To ensure the highest quality and meet users' expectations, all components of our products are manufactured from materials of the highest quality.

Before any product is marketed, it undergoes rigorous testing toward its utility, defectiveness, comfort of use, visual appeal of the finished product and other essential features that contribute to its character.

Thus, we can guarantee that we offer a product of the highest quality and resilience which will satisfy the expectations of even the most demanding users.

X Block modular system set

The **X Block modular system** has been especially designed for professionals working in harsh conditions on a daily basis. The tightly designed boxes with a solid gasket available in PRO, LOG line are IP65 rated dust-tight and waterproof workshop containers for storing and transporting heavy tools.

The set consists of three units. The first of them is a mobile module in built-in version. It is equipped with elastomer-covered treaded wheels and an aluminium telescopic handle for improved balance and better driving comfort. The module is provided with two side organisers and two carriers making it easier to keep the hand tools organised within the box. The second unit is X-Block organiser. It is fitted with two handles for easy transport. The tool organiser is built into the lid. The detachable cups and dividers inside the unit make it possible to organise the space for small items.

The last component of this set is a basket with two detachable organisers that divide its large space into areas for storing smaller tools.
